Sluishuis, Amsterdam, Netherlands

At the edge of Amsterdam's IJmeer, rising 40m from the water, this block of 442 energy-neutral apartments surrounds an internal harbour with a double cantilever that forms a gateway. It is experienced differently from every angle, elevated on one side and stepped down on the other.

Merdeka Tower, Kuala Lumpur, Malaysia

One of the world's tallest skyscrapers, 679m high, built in 2023, this narrow tower consisting of triangular glass planes and a 160m spire is set next to the Merdeka Stadium. The mixed-use design with an observatory floor is fully integrated with the city's rail networks.

One Za'abeel Towers, Dubai, UAE

Measuring 67.5m, the world's longest cantilever forms part of a horizontal structure called The Link, a bridge, dramatically suspended between two skyscrapers at the mixed-use One Za'abeel development, soaring 100m above a six-lane highway and topped by a giant infinity pool.

St. Regis, Chicago, USA

A 101-storey hotel and residential tower and the tallest skyscraper designed by a woman. Based on a frustum, a geometric design in a truncated pyramid form, it consists of three linked towers, called 'stems' with differing heights, each alternated to create an undulating, sculpted feel.

One Park Drive, Canary Wharf, London, UK

Cylindrical in shape, with 484 apartments and penthouses over 57 storeys, this residential tower adds a new dimension to an area dominated by commercial space. White terracotta and offset balconies define the appearance of the façade and infuse it with a fine, structured character.

Rundeskogen, Sandnes, Norway

On a wooded hill by the coast, this hybrid concrete and timber construction of three residential towers in a prismatic shape plan contains 113 units with views across the landscape and generous social spaces. The first floors have been lifted off the ground, cantilevering from the core.
